Spill or Leak Procedures

Steps to Take in Case Material Is
Released or Spilled:No adverse health affects expected from the clean-up of spilled material. Follow personal
protective equipment recommendations found in Section 8 of this (M)SDS. Poses little or no
immediate hazard Ventilate the contaminated area. Avoid the generation of dusts during
clean-up.
Prevent the spread of any spill to minimize harm to human health and the environment if safe
to do so. Wear complete and proper personal protective equipment following the
recommendation of Section 8 at a minimum. Dike with suitable absorbent material like
granulated clay. Gather and store in a sealed container pending a waste disposal evaluation.
Vacuum or sweep up material and place in a disposal container
